"When I first encountered First Nations people, they told me we are made of the four sacred elements: earth, air, fire and water. As I reflected on that, I realized we've framed the environmental problem the wrong way. There's no environment "out there" for us to interact with. We are the environment, because we are the Earth. For me, that began a whole shift in the way that I looked at the issues that confront us and the way we live on this planet." — David Suzuki
